#### CABINET SLATES.

President Cleveland is going to have a large and able-bedied corps of assistants in making up his Cabinet slate. Whatever else be may lack that will not be one.

Still up to date no very extensive list has been suggested. From New England come suggestions of Hon. P. A. Collins, of Massachusetts, for Attorney General and Hon. E. J. Phelps, of Vermont, for Secretary of State. New York offers Senator Hill, ex Secretary Whitney, ex-Secretary Fairchild and Gen. Tracey, of Albany, for any place which might be offered. It is generally conceded that ex-Secretary Whitney can have any place he wants, but it is generally understood that he would prefor a foreign mission.

Chairman Harrity, of Ponusylvania, divides honors with Governor Gray, of Indians, as a candidate for Postmaster General. Bayard and Gray, of Delaware, are considered as possessing good material for the State Department. The Treasury Department might readily fall to the lot of Senator Gorman, of Maryland, if he wanted it, which is doubtful.

The most promising timber in the South is Hoke Smith, of Georgia, an original Cleveland man, who did more to keep Georgia in line for Cleveland than any other man. He would make an ideal attorney general and stands very close to Mr. Cleveland.

Hon. Hilleary Herbert, of Alabama, is spoken of as a promising man for the Naval portfolio. Agriculture is apt to be represented from the Pacific Slope, and the Mississippi Valley should be in line for the Interior Department.

#### Did Not Fulfill His Wager,

An agreement was made between a Democrat near the brewery and a promineat butcher at the city market , who is a Republican, that if Cleveland was olected the Republican had to haul the Demograt from the brewery in a wheel-barrow to the corner of Campbell avenue and Jefferson street and vice versa if ilarrison was elected. To bind the bargain the gentlemen put up \$20 each and the one failing to comply with the agreement lost the money. Yesterday afternoon at 2 o'clock was the time set for the ride which did not take place. It is presumed that the \$20 is now swelling the poketbook of the gentleman near the brewery. elected the Republican had to haul the

Ed Donnelly and Fred Zerly, two of the Friendship Fire Company's boys, who won their wager on the election of Will receive it to morrow evening in the shape of a realistic and exciting wheelbarrow rite from the Friendship's building to the Junior's and back. The wheelers are Mesars. Otton Falk and Frank Moore.

#### A Flambeau Club Organized.

Since the election steps have been taken to organize a flambeau club, its object being to participate in Cleveland's inauguration. The movement was a popular one and the club has a large and growing membership. The hats, capes and flambeaus have been ordered and if they arrive in time the club will participate in the parade Thursday night. Anyone wishing to join can do so by leaving their name at Lyle's drug store, the Roanoke Savings bank or The Times office.

#### He Went Home to Vote.

TO THE EDITOR OF THE TIMES: Congratulations! Cleveland and Stevenson, tariff reform and the sovereignty of the States have triumphed. I predicted Cleveland's nomination and his election cieveland's nomination and his election six months prior to the Chicago convention. My anticipations have been more than realized. I congratulate Roanoke on the splendid showing she made on the side of Democratic principles and Lonest government. Hurral for Roanoke! Hurrah for old Virginia!! Hurrah for Grever and Baby Eath.

WM H. VALENTINE

THE TINKER CREEK SEWER.

A Bill of Chancery Filed in the Clerk's Office Yesterday.

A bill of chancery was filed in the clerk's office yesterday in which W. A Pedigo, Harry Jack and E. S. Wingfield property owners of Vinton, ask that the city of Roanoke be restrained from emptying her sewers into Tinker Creek emptying her sewers into Tinker Creek
the boundery line between the twe
places. The bill recites that the city
of Roanoke is already a city of consider
able size, and is a fast growing place
making it necessary for other sowers
to be beilt in order to meet the exigen
cies of the great increase of population
and in contemplation of this large
growth and inflex of population the
detendants deem it necessary and ex
pedients to build other sowers

pedi in to build other sewers

It has now in the course of construction a large drain, which has for its object the drainage of the sewer pipes of nearly the whole of said city, and it is comed obnoxious and dangerous to the health of the outles comments.

realth of the entire community.

The bill also recites that the defendant city has never at any time taken steps looking to the condennation of Tinker creek for the purpose of a sewer, or any property on either side of same, but has unlawfully created and continued the misance aforesaid with.

same, but has unlawfully created and continued the nuisance aforesaid without making any compensation there for, with a rockless disregard of the health of the people in the vicinity.

It further recites that the city of Roanoke be made a party defendant to this bill and required to answer for same and that the city be restrained from further polluting the waters of Tinker creek and that the nuisance complained creek and that the nuisance complained of be abated and the city be required to cleanse said creek.

William Lunsford represents the complainants and in conjunction with this the Carr heirs have employed Messrs. Penn and Cocke in a similar suit.

#### A Driver's Miraculous Escape

What promised to be a very serious accident occurred yesterday about 12 o'clock on Jefferson street. A horse, belonging to J. C. Levy, attached to a light buggy and driven by a colored light buggy and driven by a colored youth named Ben Holland, became frightened on account of a broken shaft and came tearing down Jefferson street at a mad rate. When in front of the National Savings Bank, the runaway collided with a horse and buggy belonging to S. W. Jamison, which was hitched on the edge of the curbing. Mr. Jawison's horse and buggy were both thrown over the curbing to the center of the sidewalk. The cellision started Ben skyward, but he miraculously escaped by having his foot caught in the lines, and he fell over the shaft more frightened than hurt. ened than hurt.

#### St. Andrew's Roll of Honor.

The following is the honor roll of St. Andrew's school for the month ending November 8: John Brophy, Herman Brown, Robert Cooper, Garvey Driscoll, Charles Duggan, Alaysius Fritz, Ed-ward Horgan, Thomas Ilaley, John Haley, Bernard McGehee, John Mc-Gehee, Junius McGehee, William Mc Genee, Junius McGehee, William McDermott, James Poague, Szewart Poague, Lawrerce Rowan, Charles Ruggles, Ernest Seifert, William Sheehan, James Waters, Gertrude Arnold, Deborah Arnold, Regina Carr, Maggie Cooper, Alice Dugan, Mamie Kennedy, Maggie Kennedy, Laura Madigan, Bridget Madigan, Jennie McNamara, Alice McDermott, Anna Prendergratt, Lenora Ponder, Lucy Rowan. dergrast, Lenora Ponder, Lucy Rowan, Lizzie Sauter, Maggie Tierney, Ciara White-M. Falhon, teacher.

#### Football on Thanksgiving

It is quite likely that a feotball match will be arranged for Thanksgiving day between a team from Bluefield and a team composed largely of members of the Roanoke Athletic Club. The Blue-field boys are anxious to come hers on that day. All members of the Athletic Club who are interested in foot ball are requested to meet on the Jeannet:cotact at 4:30 o'clock this afternoon.

#### A Sad Bereavement.

The little four-year-old son of Mr. and Mrs. James Richmond, died of diphtheria yesterday morning at 1 o'clock and was buried in the City Cemetery at 4 o'clock in the afternoon.
Rev. W. T. Schooley conducted the funeral services. This is the second death in the family within the past two days the former being a daughter sight. the former being a daughter eight years of ago.

#### Asks For a Divorce

J. W. Hartwell, as counsel for Samuel H. Attick, filed a bill of complaint yesterday in the clerk's office for a divorce against Rosetta Attick. The bill recites that the complaint was made on the grounds of the infidelity of the lat-

A GREAT INVENTION.

The Art of Hardening Copper Rediscov-

ered by Ferdhand Allard. Success comes early in life to some peo Success comes early in life to some people and late to others. Some, like Byron, wake to find themselves famous, while others are crowned with laurels only after long years and many efforts.

This last is the case of Ferdinand Allard, the inventor of hardened copper. Allard can render copper so hard that it can be ground to an edge, and not only can it be

can render copper so hard that it can be ground to an edge, and not only can it be used to replace steel, but its substitution is often an improvement.

The reality and genuineness of the invention has been attested by such a well known scientist as the Abbe Professor Laffamme, of Laval university, Quebec, and Sergeant Major Richard, of the Quebec Rifle corps, who fired three times with a Smider rifle at a sheet 1½ inches thick. In every case the bullets were shattered. Experiments made in the British Royal dockyards on a piece of the same thickness have been eminently successful also.

Allard has already made axes, razors and other cutting tools of this prepared copper, which takes an excellent edge, and such pieces of cuttery have the advantage, as he carefully pointed out, of being tem-

as he carefully pointed out, of being tempered throughout, whereas tools of iron and steel have only the edge tempered.

The inventor himself, Ferdinand Allard, is a typical French-Canadian—honest, industrious and good tempered. He was born at Cap Sante, Que., seventy-six years ago. Allard early showed a marked preference for blacksmithing, and when he was about twenty-six he went to New York to learn his trade more thor

oughly.
"For sixteen years," Allard said, in speaking of his invention, "I lived in New York working at my trade. Well, one day while we were eating dinner a comrade

FERDINAND ALLARD.

began reading the newspaper to me—for I cannot read," he added diffidently, "and there was one item that interested me very much. It said that the Egyptians had known of a method of hardening copper, but that this was now one of the lost arts, and that a fortune awaited the man who should rediscover it.

should rediscover it.

"That made a great impression upon me.
I thought and thought about it, and all my
spare moments I experimented. When I
came back to Quebec I still experimented.
At last I resolved to try just once more
and then give up forever, for I had tried
all sorts of experiments for thirty-three
years without success. This time I stee
ceeded. When I was convinced that I had
really made a genuine discovery I went to

ceeded. When I was convinced that I had really made a genuine discovery I went to the Abbe Laflamme and told him, and he advised me what to do."

All this was of course in French, for Allard does not speak English, though he maderstands it fairly well. As for himself and his surroundings, he is a man seventy six years of age, and has a family of twelve children—nine girls and three boys—all living and grown up, and as hale and hearty as himself and his wife, who is about his own age. His expression is honest, good tempered and pleasant, and his black eyes beam with intelligence. He is a broad shouldered, rather thickset man

black eyes beam with intelligence. He is a broad shouldered, rather thickset man 5 feet 8½ inches in height and weighing about 200 pounds. He is proud that he has never had a day's illness in his life. For some years past Allard has lived at Point Levis, which lies on the opposite side of the St. Lawrence to Quebec. Here in his little blacksmith shop, only 16 by 24 feet it size, he made his great discovery. The shop and cottage were both built by himself and his sons, and for many years Allard, his and cottage were ooth out by himself and his sons, and for many years Allard, his wife, four unmarried daughters and one son have lived here content and happy it their humble sphere of life, the father earning a scanty living, but always hope ful of success in his lifelong ambition.

In addition to copper plates Allard makes hardened copper carriage springs that have all the elasticity of the best steel springs and are not so liable to break. He uses ε and are not so hable to break. He uses great deal of charcoal, and the length of time required depends upon the thickness of the sheet or the size of the article to be hardened; a piece of copper 8 feet long by wide requires about twenty-four hours, and the process has the further advantage of

being simple and inexpensive.

Besides its many other uses hardened copper will doubtless be of great service in the manufacture of the commutators and herebes of dynamics. brushes of dynamos.

rushes of dynamos. So soon as he realizes from his discovery Allard says it is his intention to place the money in the hands of the Roman Catholic clergy, who will pay him the interest on it

New Jersey's World's Fair Building. The New Jersey state building at the World's fair will be of interest to all visit ting patriots, as it is modeled to a great ex-tent on the Washington headquarters building at Morristowa, N. J. It is not in-tended for exhibition purposes, but rather for a clubhouse and general meeting place for Jerseymen. There are therefore large and inviting piazzas in the front and rear, and the main entrance opens into a large general assembly hall two stories high, with a circular balcony looking down from the second story.

THE NEW JERSEY BUILDING.

This hall contains the postoffice, hat and cloak counters, a very large open fireplace and the main staircase leading to the upper section. The design of Mr. Gifford, the section. The design of Mr. Gilford, the architect, was to make the structure typical of the state, and such it is in its likeness to its old colonial model, as well as in its materic, is and finish. It is centrally located, with Massachusetts, Connecticut, Rhode Island and New York for its nearest neighbors.
